Making Mice: Standardizing Animals for American Biomedical Research, 1900-1955 Karen Rader

Making Mice blends scientific biography, institutional history, and cultural history to show how genetically standardized mice came to play a central role in contemporary American biomedical research.

Karen Rader introduces us to mouse "fanciers" who bred mice for different characteristics, to scientific entrepreneurs like geneticist C. C. Little, and to the emerging structures of modern biomedical research centered around the National Institutes of Health. Throughout *Making Mice*, Rader explains how the story of mouse research illuminates our understanding of key issues in the history of science such as the role of model organisms in furthering scientific thought. Ultimately, genetically standardized mice became icons of standardization in biomedicine by successfully negotiating the tension between the natural and the man-made in experimental practice.

This book will become a landmark work for its understanding of the cultural and institutional origins of modern biomedical research. It will appeal not only to historians of science but also to biologists and medical researchers.

From reader reviews:

Ricky Hayes:

Book will be written, printed, or highlighted for everything. You can realize everything you want by a e-book. Book has a different type. As it is known to us that book is important issue to bring us around the world. Next to that you can your reading ability was fluently. A reserve Making Mice: Standardizing Animals for American Biomedical Research, 1900-1955 will make you to possibly be smarter. You can feel far more confidence if you can know about every thing. But some of you think in which open or reading any book make you bored. It's not make you fun. Why they might be thought like that? Have you trying to find best book or appropriate book with you?

Victoria Austin:

Reading a publication can be one of a lot of task that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new data. When you read a guide you will get new information mainly because book is one of numerous ways to share the information or their idea. Second, reading through a book will make anyone more imaginative. When you examining a book especially fiction book the author will bring you to definitely imagine the story how the characters do it anything. Third, you could share your knowledge to other people. When you read this Making Mice: Standardizing Animals for American Biomedical Research, 1900-1955, it is possible to tells your family, friends as well as soon about yours reserve. Your knowledge can inspire average, make them reading a book.

Susan Bondurant:

As a pupil exactly feel bored to reading. If their teacher expected them to go to the library or even make summary for some book, they are complained. Just small students that has reading's soul or real their pastime. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that studying is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Making Mice: Standardizing Animals for American Biomedical Research, 1900-1955 can make you sense more interested to read.

Charlotte Neville:

Reading a e-book make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is written or printed or created from each source that will filled update of news. In this particular modern era like currently, many ways to get information are available for an individual. From media social including newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book?

Or just looking for the Making Mice: Standardizing Animals for American Biomedical Research, 1900-1955 when you necessary it?
