## **Sorting Out the Web: Approaches to Subject Access (Information Management Policy and Services)**

Candy Schwartz

Search engines, subject gateways, descriptive metadata, Web cataloging--everyone is looking for ways to support information discovery and retrieval on the Internet. To become full partners in new digital access ventures, library and information professionals need to be familiar with effective tools and strategies, and need to make decisions about what is appropriate for different resources, settings and communities. This book takes a look at what has been done in providing subject access to networked resources, and what is around the corner.

Accompanied by ample illustrations and complementary online material, topics include: Metadata, as a potentiator of subject description; classification schemes and directories; alphabetical subject engines in all their variety; and trends in subject description and access. A book directed to information professional, educators, and students involved in Web design, cataloging, indexing, reference, and information retrieval.
