  - Course of the disease (providing final clinical or necropsy diagnosis and a brief discussion of the syndrome)
- More than 600 full-color photographs and line drawings, plus approximately 150 high-quality radiographs, visually reinforce key concepts and assist in reaching accurate diagnoses.
- The book comes with free access to 370 video clips on Cornell University's website that directly correlate to the case studies throughout the book and clearly demonstrate nearly every recognized neurologic disorder.
- High-quality MR images of the brain are presented alongside correlating stained transverse sections for in-depth study and comparison.
- Vivid photos of gross and microscopic lesions clearly illustrate the pathology of many of the disorders presented in the book.
