## Arab Cultural Studies: Mapping the Field

Arab Cultural Studies: Mapping the Field is the first attempt to explore ways of conceptualizing and theorizing the nascent field of Arab Cultural Studies. It reflects and engages in an interdisciplinary discussion on the different facets of Arab cultural studies, including gender, economy, history, epistemology, language, method, politics, literary and cultural criticism, institutionalization, popular culture, creativity and much more.

The book presents a meta-narrative about how scholars have thus far thought and re-thought the field. It brings together prominent and emerging experts, writing from both Arab and Western academia, to engage with key complex, epistemic and methodological questions and to articulate in the meantime the new kinds of language and hermeneutics necessary for the appropriation of an historically conscious and coherent field of scientific enquiry into contemporary Arab media, culture and society.
