Geometry and Representation Theory of Real and p-adic groups (Progress in Mathematics)

Geometry and Representation Theory of Real and p-adic groups (Progress in Mathematics)

The representation theory of Lie groups plays a central role in both classical and recent developments in many parts of mathematics and physics. In August, 1995, the Fifth Workshop on Representation Theory of Lie Groups and its Applications took place at the Universidad Nacional de Cordoba in Argentina. Organized by Joseph Wolf, Nolan Wallach, Roberto Miatello, Juan Tirao, and Jorge Vargas, the workshop offered expository courses on current research, and individual lectures on more specialized topics. The present volume reflects the dual character of the workshop. Many of the articles will be accessible to graduate students and others entering the field. Here is a rough outline of the mathematical content. (The editors beg the indulgence of the readers for any lapses in this preface in the high standards of historical and mathematical accuracy that were imposed on the authors of the articles.) Connections between flag varieties and representation theory for real reductive groups have been studied for almost fifty years, from the work of Gelfand and Naimark on principal series representations to that of Beilinson and Bernstein on localization. The article of Wolf provides a detailed introduction to the analytic side of these developments. He describes the construction of standard tempered representations in terms of square-integrable partially harmonic forms (on certain real group orbits on a flag variety), and outlines the ingredients in the Plancherel formula. Finally, he describes recent work on the complex geometry of real group orbits on partial flag varieties.

From reader reviews:

Anthony Laflamme:

Inside other case, little folks like to read book Geometry and Representation Theory of Real and p-adic groups (Progress in Mathematics). You can choose the best book if you love reading a book. Provided that we know about how is important some sort of book Geometry and Representation Theory of Real and p-adic groups (Progress in Mathematics). You can add expertise and of course you can around the world by just a book. Absolutely right, mainly because from book you can realize everything! From your country till foreign or abroad you will be known. About simple issue until wonderful thing you can know that. In this era, we can open a book or searching by internet gadget. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's go through.

Harold Hutchison:

Nowadays reading books be a little more than want or need but also turn into a life style. This reading addiction give you lot of advantages. Advantages you got of course the knowledge even the information inside the book that will improve your knowledge and information. The details you get based on what kind of publication you read, if you want have more knowledge just go with education books but if you want experience happy read one together with theme for entertaining including comic or novel. The actual Geometry and Representation Theory of Real and p-adic groups (Progress in Mathematics) is kind of book which is giving the reader unpredictable experience.

Helen Richards:

Are you kind of hectic person, only have 10 or maybe 15 minute in your moment to upgrading your mind expertise or thinking skill even analytical thinking? Then you are having problem with the book in comparison with can satisfy your small amount of time to read it because this time you only find publication that need more time to be learn. Geometry and Representation Theory of Real and p-adic groups (Progress in Mathematics) can be your answer mainly because it can be read by anyone who have those short extra time problems.

Amy Osburn:

Many people said that they feel bored stiff when they reading a publication. They are directly felt this when they get a half elements of the book. You can choose the actual book Geometry and Representation Theory of Real and p-adic groups (Progress in Mathematics) to make your personal reading is interesting. Your personal skill of reading proficiency is developing when you similar to reading. Try to choose easy book to make you enjoy to see it and mingle the impression about book and looking at especially. It is to be first opinion for you to like to open up a book and learn it. Beside that the reserve Geometry and Representation Theory of Real and p-adic groups (Progress in Mathematics) can to be a newly purchased friend when you're feel alone and confuse in what must you're doing of the time.
