## Globalisation, Governance and Ethics: New Managerial and Economic Insights (Economic Issues, Problems and Perspectives: Global Economic Studies)

The globalisation of commerce and science means that new structures of governance are required to handle new and novel situations, such as across state and institutional boundaries. Sound governance, including elements that encourage foresight, is an important ingredient of managing global and local crisis situations. These crises are ever more apparent as a result of interdependence between consumer, firms and states across the world, especially with the ever increasing advent of instantaneous and low cost communication. This book examines the role of governance in local and multi-national businesses and in local, national and international political forums and organisations.
