Creo Parametric 1.0 for Designers Prof. Sham Tickoo Purdue Univ. and CADCIM Technologies

Creo Parametric 1.0 for Designers is a comprehensive textbook that introduces the users to Creo Parametric 1.0, a feature-based 3D parametric solid modeling software. The textbook covers all major environments of Creo Parametric 1.0 with a thorough explanation of all tools, options, and their applications to create real-world products. About 60 mechanical engineering industry examples are used as tutorials and an additional 40 as exercises to ensure that the users can relate their knowledge and understand the design techniques used in the industry.

After reading the textbook, the users will be able to create parts and assemblies, and then render them, create drawing views with bill of materials, and learn the editing techniques that are essential to make a successful design. Also, the surfacing techniques like Style and Freestyle are discussed in this book.

Salient Features of the Textbook

Consists of 16 pedagogical sequenced chapters covering the Sketching, Modeling, Assembly, Drafting, Surfacing, and Sheet Metal environments of Creo Parametric 1.0.

The first page of every chapter summarizes the topics that will be covered in it.

#Real-world projects and examples focusing on industry experience.

#Step-by-step examples that guide the users through the learning process.

#Additional information is provided throughout the textbook in the form of tips and notes.

#Self-Evaluation test and review questions are provided at the end of each chapter so that the users can assess their knowledge.

Free Teaching and Learning Resources CADCIM Technologies provides the following Free Teaching and Learning Resources with this textbook:

Technical support

#Drawing files of the models used in illustrations, examples, and exercises

#Customizable PowerPoint presentations of every chapter in this textbook

#Instructor's guide that provides solutions to review questions and exercises

#Student projects to enhance the skills

About the Author

CADCIM Technologies, Prof. Sham Tickoo of Purdue University Calumet, and the team of dedicated contributing authors are committed to bring you the best textbooks and free teaching and learning resources on Computer Aided Design and Manufacturing (CAD/CAM), Computer Programming and Applications, GIS, Civil, Animation, and related technologies. We strive to be the first and the best. That is our promise

and our goal.

Our team of authors consists of highly qualified and experienced Professionals who have a strong academic and industrial background. They understand the needs of the students, the faculty, and the challenges the students face when they start working in industry. All our textbooks have been structured in a way that facilitates teaching and learning, and also exposes students to real-world applications. The textbooks, apart from providing comprehensive study material, are well appreciated for the simplicity of content, clarity of style, and the in-depth coverage of the subject.

From reader reviews:

Michael Gibson:

Hey guys, do you desire to find a new book you just read? Maybe the book with the name Creo Parametric 1.0 for Designers suitable to you? The actual book was written by a famous writer in this era. The particular book titled Creo Parametric 1.0 for Designers is the one of several books that will everyone read now. This book was inspired a lot of people in the world. When you read this guide you will enter the new age that you ever know ahead of. The author explained their strategy in the simple way, thus all of people can easily to recognise the core of this reserve. This book will give you a great deal of information about this world now. In order to see the represented of the world on this book.

Lisa Bates:

Reading a book can be one of a lot of action that everyone in the world really likes. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new data. When you read a book you will get new information because book is one of a number of ways to share the information or perhaps their idea. Second, looking at a book will make you actually more imaginative. When you reading through a book especially hype book the author will bring you to imagine the story how the people do it anything. Third, it is possible to share your knowledge to other people. When you read this Creo Parametric 1.0 for Designers, it is possible to tell your family, friends along with soon about your book. Your knowledge can inspire average, make them reading a reserve.

John Keaney:

People live in this new day time of lifestyle always try to and must have the extra time or they will get large amount of stress from both day to day life and work. So, whenever we ask do people have free time, we will say absolutely sure. People is human not really a robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer will probably unlimited right. Then ever try this one, reading ebooks. It can be your alternative inside spending your spare time, the actual book you have read will be Creo Parametric 1.0 for Designers.

Jim Molnar:

As a college student exactly feel bored to help reading. If their teacher asked them to go to the library or even make summary for some e-book, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that studying is not important, boring and can't see colorful photos on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So, this Creo Parametric 1.0 for Designers can make you really feel more interested to read.
