This manual was written to be used with *Seeley's Anatomy & Physiology*, tenth edition, by VanPutte, Regan, and Russo. The illustrations are labeled: therefore, students do not need to bring their lecture text to lab. The lab manual accompanies the lecture text and lecture portion of the course and can be used in either a one-term or a full-year course. The illustrations are outstanding, and the balanced combination of line art and photographs provides effective coverage.
