Popular for its **highly visual, straightforward approach**, *Cellular and Molecular Immunology* delivers an **accessible yet thorough understanding** of this active and fast-changing field. Drs. Abul K. Abbas, Andrew H. Lichtman, and Shiv Pillai present **key updates** in this new edition to cover the latest developments in antigen receptors and signal transduction in immune cells, mucosal and skin immunity, cytokines, leukocyte-endothelial interaction, and more. With additional online features, this is an **ideal resource** for medical, graduate and undergraduate students of immunology who need a clear, introductory text for immunology courses.

- **Develop a thorough, clinically relevant understanding of immunology** through a clear overview of immunology with a distinct focus on the management of human disease.
- **Visualize immunologic processes more effectively.** Meticulously developed and updated illustrations, 3-dimensional art, and all-new online animations provide a detailed, visual description of the key immunologic and molecular processes.
- **Grasp the details of experimental observations** that form the basis for the science of immunology at the molecular, cellular, and whole-organism levels and draw the appropriate conclusions.
- Find information more quickly and easily through an organized chapter structure and a more logical flow of material.
- **Access to StudentConsult and Evolve** provides a rich online experience for students and instructors alike including searchable content, question banks, animations, and more.
- **Glean all essential, up-to-date, need-to-know information about** immunology and molecular biology through extensive updates that cover cytokines, innate immunity, leukocyte-endothelial interactions, signaling, costimulation, and more.
- **Benefit from numerous new figures and tables** that facilitate easier retention of the material; **quick summaries** of each chapter; and **nearly 400 illustrations** that clarify key concepts.
