Stoichiometry and Thermodynamics of Metallurgical Processes Y. K. Rao

Originally published in 1985, this textbook provides a thorough and comprehensive coverage of a wide range of topics in stoichiometry and thermodynamics with special emphasis on applications to metallurgical processes. The author's approach is to introduce students to the fundamental notions of physical chemistry and thermodynamics and then to expand the treatment gradually into progressively more advanced areas. This book will be welcomed as a text for courses in elementary and advanced thermodynamics and stoichiometry. The topics covered are both theoretical and practical. The examples and exercises range from straightforward tests of theory and simple numerical problems to complex analyses of real processes. Every chapter ends with full and up-to-date references. It can also serve as a valuable reference book for professional metallurgists, materials scientists, ceramicists, chemists, chemical engineers and fuel technologists.

From reader reviews:

James Jean:

This Stoichiometry and Thermodynamics of Metallurgical Processes are generally reliable for you who want to become a successful person, why. The reason why of this Stoichiometry and Thermodynamics of Metallurgical Processes can be among the great books you must have is giving you more than just simple looking at food but feed anyone with information that probably will shock your prior knowledge. This book is usually handy, you can bring it almost everywhere and whenever your conditions at e-book and printed people. Beside that this Stoichiometry and Thermodynamics of Metallurgical Processes forcing you to have an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day pastime. So, let's have it and luxuriate in reading.

Emilie Lechner:

This Stoichiometry and Thermodynamics of Metallurgical Processes is brand-new way for you who has curiosity to look for some information because it relief your hunger of information. Getting deeper you into it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Stoichiometry and Thermodynamics of Metallurgical Processes can be the light food for you personally because the information inside that book is easy to get by means of anyone. These books build itself in the form which can be reachable by anyone, yes I mean in the e-book form. People who think that in publication form make them feel drowsy even dizzy this reserve is the answer. So there is not any in reading a guide especially this one. Marvin Davidson:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book was rare? Why so many concern for the book? But any people feel that they enjoy intended for reading. Some people likes examining, not only science book and also novel and Stoichiometry and Thermodynamics of Metallurgical Processes or maybe others sources were given expertise for you. After you know how the great a book, you feel want to read more and more. Science e-book was created for teacher or maybe students especially. Those textbooks are helping them to add their knowledge. In additional case, beside science guide, any other book likes Stoichiometry and Thermodynamics of Metallurgical Processes to make your spare time a lot more colorful. Many types of book like this.

Haydee Todd:

Many people said that they feel bored stiff when they reading a guide. They are directly felt the item when they get a half areas of the book. You can choose the book Stoichiometry and Thermodynamics of Metallurgical Processes to make your reading is interesting. Your skill of reading skill is developing when you like reading. Try to choose very simple book to make you enjoy to see it and mingle the impression

about book and examining especially. It is to be very first opinion for you to like to available a book and go through it. Beside that the book Stoichiometry and Thermodynamics of Metallurgical Processes can to be your friend when you're sense alone and confuse in what must you're doing of the time.
