Economics and Computation: An Introduction to Algorithmic Game Theory, Computational Social Choice, and Fair Division (Springer Texts in Business and Economics)

Economics and Computation: An Introduction to Algorithmic Game Theory, Computational Social Choice, and Fair Division (Springer Texts in Business and Economics)

This textbook connects three vibrant areas at the interface between economics and computer science: algorithmic game theory, computational social choice, and fair division. It thus offers an interdisciplinary treatment of collective decision making from an economic and computational perspective. Part I introduces to algorithmic game theory, focusing on both noncooperative and cooperative game theory. Part II introduces to computational social choice, focusing on both preference aggregation (voting) and judgment aggregation. Part III introduces to fair division, focusing on the division of both a single divisible resource ("cake-cutting") and multiple indivisible and unshareable resources ("multiagent resource allocation"). In all these parts, much weight is given to the algorithmic and complexity-theoretic aspects of problems arising in these areas, and the interconnections between the three parts are of central interest.

From reader reviews:

Brent Abramson:

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to typically the Mall. How about open as well as read a book allowed Economics and Computation: An Introduction to Algorithmic Game Theory, Computational Social Choice, and Fair Division (Springer Texts in Business and Economics)? Maybe it is to become best activity for you. You understand beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with its opinion or you have different opinion?

Randy Caldera:

What do you in relation to book? It is not important along? Or just adding material when you want something to explain what the ones you have problem? How about your free time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have time? What did you do? Every person has many questions above. The doctor has to answer that question simply because just their can do this. It said that about publication. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular Economics and Computation: An Introduction to Algorithmic Game Theory, Computational Social Choice, and Fair Division (Springer Texts in Business and Economics) to read.

Julie Slocum:

Many people spending their time frame by playing outside together with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to pay your whole day by studying a book. Ugh, think reading a book can definitely hard because you have to bring the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Smart phone. Like Economics and Computation: An Introduction to Algorithmic Game Theory, Computational Social Choice, and Fair Division (Springer Texts in Business and Economics) which is keeping the e-book version. So , try out this book? Let's see.

Ira Atwood:

Don't be worry should you be afraid that this book will filled the space in your house, you might have it in e-book way, more simple and reachable. This particular Economics and Computation: An Introduction to Algorithmic Game Theory, Computational Social Choice, and Fair Division (Springer Texts in Business and Economics) can give you a lot of friends because by you looking at this one book you have point that they don't and make a person more like an interesting person. This particular book can be one of a step for you to get success. This publication offer you information that perhaps your friend doesn't realize, by knowing more than other make you to be great men and women. So , why hesitate? We need to have Economics and Computation: An Introduction to Algorithmic Game Theory, Computational Social Choice, and Fair

Division (Springer Texts in Business and Economics).
