# Ground Improvement: Case Histories (Elsevier Geo-Engineering Book)

*Cholachat Rujikiatkamjorn, Buddhima Indraratna, Professor Jian Chu*

Discusses wider economical and environmental issues facing scientists in the ground improvement.

Ground improvement has been both a science and art, with significant developments observed through ancient history. From the use of straw as blended infill with soils for additional strength during the ancient Roman civilizations, and the use of elephants for compaction of earth dams during the early Asian civilizations, the concepts of reinforced earth with geosynthetics, use of electrokinetics and thermal modifications of soils have come a long way. The use of large and stiff stone columns and subsequent sand drains in the past has now been replaced by quicker to install and more effective prefabricated vertical drains, which have also eliminated the need for more expensive soil improvement methods.

The early selection and application of the most appropriate ground improvement techniques can improve considerably not only the design and performance of foundations and earth structures, including embankments, cut slopes, roads, railways and tailings dams, but also result in their cost-effectiveness. Ground improvement works have become increasingly challenging when more and more problematic soils and marginal land have to be utilized for infrastructure development.

This edited compilation contains a collection of Chapters from invited experts in various areas of ground improvement, who have illustrated the basic concepts and the applications of different ground improvement techniques using real projects that they have been involved in. The case histories from many countries ranging from Asia, America, Australia and Europe are addressed.

**From reader reviews:**

Joan Jackson: Now a day people who Living in the era wherever everything reachable by interact with the internet and the resources inside can be true or not need people to be aware of each data they get. How people have to be smart in receiving any information nowadays? Of course the reply is reading a book. Reading a book can help people out of this uncertainty Information mainly this Ground Improvement: Case Histories (Elsevier Geo-Engineering Book) book because this book offers you rich information and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you may already know.

Dee Alaniz: That book can make you to feel relax. This kind of book Ground Improvement: Case Histories (Elsevier Geo-Engineering Book) was colorful and of course has pictures around. As we know that book Ground Improvement: Case Histories (Elsevier Geo-Engineering Book) has many kinds or variety. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and feel that you are the character on there. Therefore not at all of book tend to be make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading that will.

Daryl Pena: A lot of book has printed but it differs from the others. You can get it by online on social media. You can choose the very best book for you, science, comedian, novel, or whatever by searching from it. It is identified as of book Ground Improvement: Case Histories (Elsevier Geo-Engineering Book). You can add your knowledge by it. Without making the printed book, it may add your knowledge and make anyone happier to read. It is most crucial that, you must aware about reserve. It can bring you from one destination for a other place.

Donald Rivera: What is your hobby? Have you heard that will question when you got students? We believe that that query was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person similar to reading or as looking at become their hobby. You need to know that reading is very important along with book as to be the factor. Book is important thing to increase you knowledge, except your current teacher or lecturer. You will find good news or update regarding something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is actually Ground Improvement: Case Histories (Elsevier Geo-Engineering Book).
