Roberto Brunelli

## **Template Matching Techniques in Computer Vision: Theory and Practice** Roberto Brunelli

The detection and recognition of objects in images is a key research topic in the computer vision community. Within this area, face recognition and interpretation has attracted increasing attention owing to the possibility of unveiling human perception mechanisms, and for the development of practical biometric systems. This book and the accompanying website, focus on template matching, a subset of object recognition techniques of wide applicability, which has proved to be particularly effective for face recognition applications. Using examples from face processing tasks throughout the book to illustrate more general object recognition approaches, Roberto Brunelli:

- examines the basics of digital image formation, highlighting points critical to the task of template matching;
- presents basic and advanced template matching techniques, targeting grey-level images, shapes and point sets;
- discusses recent pattern classification paradigms from a template matching perspective;
- illustrates the development of a real face recognition system;
- explores the use of advanced computer graphics techniques in the development of computer vision algorithms.

*Template Matching Techniques in Computer Vision* is primarily aimed at practitioners working on the development of systems for effective object recognition such as biometrics, robot navigation, multimedia retrieval and landmark detection. It is also of interest to graduate students undertaking studies in these areas.

### **From reader reviews:**

#### **Donna Jost:**

Within other case, little people like to read book Template Matching Techniques in Computer Vision: Theory and Practice. You can choose the best book if you want reading a book. Providing we know about how is important any book Template Matching Techniques in Computer Vision: Theory and Practice. You can add information and of course you can around the world by a book. Absolutely right, since from book you can realize everything! From your country until eventually foreign or abroad you will find yourself known. About simple matter until wonderful thing you can know that. In this era, you can open a book or searching by internet system. It is called e-book. You can use it when you feel uninterested to go to the library. Let's examine.

#### **Ella McCoy:**

In this 21st millennium, people become competitive in each way. By being competitive right now, people have do something to make them survives, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yep, by reading a e-book your ability to survive boost then having chance to remain than other is high. In your case who want to start reading any book, we give you this Template Matching Techniques in Computer Vision: Theory and Practice book as beginner and daily reading publication. Why, because this book is usually more than just a book.

#### **Eileen Moore:**

Playing with family inside a park, coming to see the sea world or hanging out with pals is thing that usually you have done when you have spare time, then why you don't try factor that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Template Matching Techniques in Computer Vision: Theory and Practice, it is possible to enjoy both. It is great combination right, you still would like to miss it? What kind of hang-out type is it? Oh can occur its mind hangout folks. What? Still don't obtain it, oh come on its referred to as reading friends.

#### **Roberta Lawrence:**

What is your hobby? Have you heard in which question when you got pupils? We believe that that issue was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person just like reading or as examining become their hobby. You should know that reading is very important and book as to be the thing. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You find good news or update concerning something by book. Many kinds of books that can you choose to use be your object. One of them are these claims Template Matching Techniques in Computer Vision: Theory and Practice.
