Maximum Likelihood Estimation with Stata, Fourth Edition William Gould, Jeffrey Pitblado, Brian Poi

Maximum Likelihood Estimation with Stata, Fourth Edition is written for researchers in all disciplines who need to compute maximum likelihood estimators that are not available as prepackaged routines. Readers are presumed to be familiar with Stata, but no special programming skills are assumed except in the last few chapters, which detail how to add a new estimation command to Stata. The book begins with an introduction to the theory of maximum likelihood estimation with particular attention on the practical implications for applied work. Individual chapters then describe in detail each of the four types of likelihood evaluator programs and provide numerous examples, such as logit and probit regression, Weibull regression, randomeffects linear regression, and the Cox proportional hazards model. Later chapters and appendixes provide additional details about the ml command, provide checklists to follow when writing evaluators, and show how to write your own estimation commands.

#### From reader reviews:

#### Tanisha Goss:

What do you concentrate on book? It is just for students since they are still students or that for all people in the world, exactly what the best subject for that? Simply you can be answered for that concern above. Every person has various personality and hobby per other. Don't to be forced someone or something that they don't wish do that. You must know how great along with important the book Maximum Likelihood Estimation with Stata, Fourth Edition. All type of book could you see on many resources. You can look for the internet resources or other social media.

#### Malcolm Khan:

Book is to be different for every single grade. Book for children right up until adult are different content. We all know that that book is very important for us. The book Maximum Likelihood Estimation with Stata, Fourth Edition was making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The guide Maximum Likelihood Estimation with Stata, Fourth Edition is not only giving you much more new information but also for being your friend when you experience bored. You can spend your spend time to read your guide. Try to make relationship while using book Maximum Likelihood Estimation with Stata, Fourth Edition. You never really feel lose out for everything in case you read some books.

#### **Todd Goff:**

E-book is one of source of expertise. We can add our information from it. Not only for students and also native or citizen have to have book to know the revise information of year for you to year. As we know those books have many advantages. Beside we add our knowledge, also can bring us to around the world. With the book Maximum Likelihood Estimation with Stata, Fourth Edition we can consider more advantage. Don't you to be creative people? To get creative person must want to read a book. Just choose the best book that acceptable with your aim. Don't be doubt to change your life at this time book Maximum Likelihood Estimation with Stata, Fourth Edition. You can more appealing than now.

#### **Bruce Harrison:**

A lot of people said that they feel weary when they reading a book. They are directly felt the item when they get a half parts of the book. You can choose the particular book Maximum Likelihood Estimation with Stata, Fourth Edition to make your personal reading is interesting. Your own personal skill of reading proficiency is developing when you like reading. Try to choose easy book to make you enjoy you just read it and mingle the idea about book and studying especially. It is to be initially opinion for you to like to available a book and examine it. Beside that the reserve Maximum Likelihood Estimation with Stata, Fourth Edition can to be a newly purchased friend when you're sense alone and confuse using what must you're doing of this time.
