Creating Urban Agricultural Systems: An Integrated Approach to Design Gundula Proksch

Creating Urban Agriculture Systems provides you with background, expertise and inspiration for designing with urban agriculture. It shows you how to grow food in buildings and cities, operate growing systems, and integrate them with natural cycles and existing infrastructures. It teaches you the essential environmental inputs and operational strategies of urban farms, and inspires community and design tools for innovative operations and sustainable urban environments that produce fresh, local food.

Over 70 projects and sixteen in-depth case studies of productive, integrated systems, located in North America, Europe and Asia are organized by their emphasis on nutrient, water, and energy management, farm operation, community integration and design approaches so that you can see innovative strategies in action. Interviews with leading architecture firms including WORKac, Kiss + Cathcart, Weber Thompson, CJ Lim/Studio 8, and SOA Architects highlight the challenges and rewards you face when creating urban agriculture systems. Catalogs of growing and building systems, a glossary, bibliography and abstracts will help you find information fast.
