What would you do if you saw someone being bullied? Would you pretend it did not happen? Would you walk away and hope that someone else will take care of it? Would you care? According to research, children with autism are more likely to be bullied than their peers. They make easy targets because they are socially awkward and often times unaware they are being bullied. For the child with autism, there are severe emotional, and sometimes physical, consequences to being repeatedly bullied. The Bully Blockers tells the story of a boy who witnesses a classmate with autism being bullied and how he decides to get involved. This book shows that one child can make a difference when he has the courage to stand up for his classmate with autism.
