Daniel Gorenstein, Richard Lyons, Ronald Solomon

The Classification of the Finite Simple Groups, Number 3 (Mathematical Surveys and Monographs) (No. 3) Daniel Gorenstein, Richard Lyons, Ronald Solomon

This book offers a single source of basic facts about the structure of the finite simple groups with emphasis on a detailed description of their local subgroup structures, coverings and automorphisms. The method is by examination of the specific groups, rather than by the development of an abstract theory of simple groups. While the purpose of the book is to provide the background for the proof of the classification of the finite simple groups--dictating the choice of topics--the subject matter is covered in such depth and detail that the book should be of interest to anyone seeking information about the structure of the finite simple groups. This volume offers a wealth of basic facts and computations. Much of the material is not readily available from any other source. In particular, the book contains the statements and proofs of the fundamental Borel-Tits Theorem and Curtis-Tits Theorem. It also contains complete information about the centralizers of semisimple involutions in groups of Lie type, as well as many other local subgroups.

From reader reviews:

Tasha Banda:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge even the information inside the book which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want drive more knowledge just go with education and learning books but if you want experience happy read one along with theme for entertaining such as comic or novel. The The Classification of the Finite Simple Groups, Number 3 (Mathematical Surveys and Monographs) (No. 3) is kind of publication which is giving the reader unpredictable experience.

Alfred Leahy:

People live in this new moment of lifestyle always aim to and must have the free time or they will get lots of stress from both daily life and work. So , once we ask do people have free time, we will say absolutely sure. People is human not really a huge robot. Then we question again, what kind of activity have you got when the spare time coming to anyone of course your answer will probably unlimited right. Then do you try this one, reading publications. It can be your alternative inside spending your spare time, the actual book you have read is usually The Classification of the Finite Simple Groups, Number 3 (Mathematical Surveys and Monographs) (No. 3).

Heidi Crenshaw:

Many people spending their time frame by playing outside together with friends, fun activity along with family or just watching TV the entire day. You can have new activity to invest your whole day by studying a book. Ugh, you think reading a book can really hard because you have to take the book everywhere? It fine you can have the e-book, getting everywhere you want in your Smart phone. Like The Classification of the Finite Simple Groups, Number 3 (Mathematical Surveys and Monographs) (No. 3) which is having the e-book version. So , why not try out this book? Let's notice.

Stephen Stansbury:

You may get this The Classification of the Finite Simple Groups, Number 3 (Mathematical Surveys and Monographs) (No. 3) by check out the bookstore or Mall. Just simply viewing or reviewing it can to be your solve issue if you get difficulties on your knowledge. Kinds of this publication are various. Not only simply by written or printed but also can you enjoy this book by simply e-book. In the modern era including now, you just looking from your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to choose suitable ways for you.
